DPDP Compliant
Data Protection Framework

How We Protect Your Information

Encryption In-Transit & At-Rest

All data is protected with TLS 1.3 during transmission and AES-256 encryption at rest. Unauthorized access is cryptographically impossible.

✕ We Never Train on Your Data

Your queries, files, and outputs are never used to train any AI model - internally or by any third-party provider. Contractually enforced across all AI vendors.

• Incognito Mode

Activate Incognito Mode to ensure zero session retention. No query history, no file storage, no conversation logs - processing is fully ephemeral.

Role-Based Access Control

Granular RBAC ensures only authorized personnel can access specific data and features. Every access event is logged and auditable.

★ ISO 27001 Certified

Riyu is certified under ISO/IEC 27001, the international gold standard for information security management systems.

◆ DPDP Framework Compliant

Built in full compliance with India's Digital Personal Data Protection Act. Your rights to access, correction, and erasure are always honoured.

Frequently Asked Questions

Does Riyu train AI on my data?

Never. Your data is never used to train any model, internally or externally. All AI providers are contractually bound by this commitment.

Where is my data stored and processed?

All data is stored and processed in secure, regionally isolated cloud environments with strict access controls and physical security.

What encryption does Riyu use?

TLS 1.3 for data in transit and AES-256 for data at rest. These are the same standards used by global financial institutions.

Who can access my data?

Your data is Secure and Private. Access is granted only under exceptional, documented circumstances such as troubleshooting. All access is logged, monitored, and subject to audit.

Can I delete all my data?

Yes. Customers have full rights under DPDP to request deletion of all data at any time. Deletion is permanent and verifiable.

What is Incognito Mode?

A privacy mode that disables all session retention. Nothing is stored - no history, no files, no logs. Processing is fully ephemeral.

Start analysing your data securely with Riyu.
